

ANIMAL SLURRIES TREATMENT UNIT model **OB-SLURLESS 100**

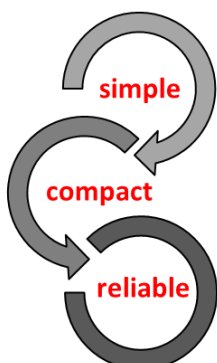

PRESENTATION OF THE PLANT **OB-SLURLESS 100**

OB-SLURLESS 100 is an innovative plant, able to treat both directly or modified cattle and suine manure, both digestate from different anaerobic digestors.

The process is based on a series of **mechanical treatments of separation and concentration via reverse osmosis membranes** that allows obtaining from one side purified water suitable for surface bodies discharge or for reuse in the Farm and from the other side a Nitrogen and Phosphorus concentrate in a very reduced volume compared with the initial liquid quantity which becomes easy for transportation, storage or transformation in an high content ammonia and phosphorus fertilizer.

**for TREATMENT & VOLUMES REDUCTION of
ANIMAL SLURRIES & DIGESTATES**
